

**BioAktiv Animal Feed
Commercial Trial on Dairy
2018**

**Darling Downs (TMR)
Lockey Valley (Pasture & TMR)
Northern NSW (Pasture)**

Members - Australian Dairy, Sub Tropical

Introduction

The following results are conducted from commercial dairy farms participating from various geographical regions.

BioAktiv is a German made product that has been widely used agriculturally and sold successfully in Europe for the past 25 years, for the improvement of animal and plant health, leading to better performances.

The product is certified organic as well, QA, GMPH, GHA, REACH, compliance and registered. As natural product it is safe to use and handle.

Each commercial dairy participating were selected for their diverse geographical location, taking consideration the various breeds and management system to include pasture, TMR application. The results are from records and data provided and reflect accordingly to the seasonal, weather conditions.

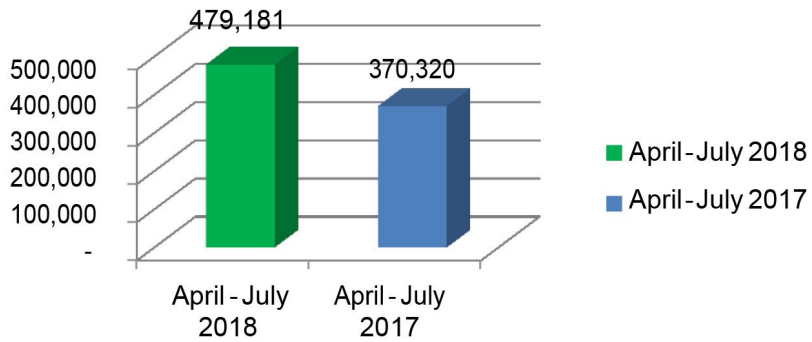

BioAktiv is used as a back to basic, biological conditioner working through the stimulation of gut microbial activity. As such, improvement in health provide various positive performances such as those provided from recorded data. Other observations has been the improvement in fertility and animal condition.

Other added benefit to which the product was originally produced for, is the improvement in waste management systems.

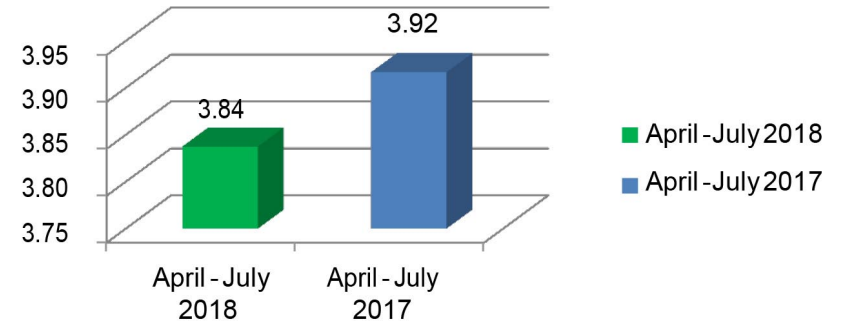

The graphs presented from data provided from the participants are however focused for commercial outcome. That is to determine profitable viability of BioAktiv relative to yields and quality. The farmers were selected according to geography, seasonal conditions, breeds and good management practice.

Dairy Location - Darling Downs, Qld Volume (L)

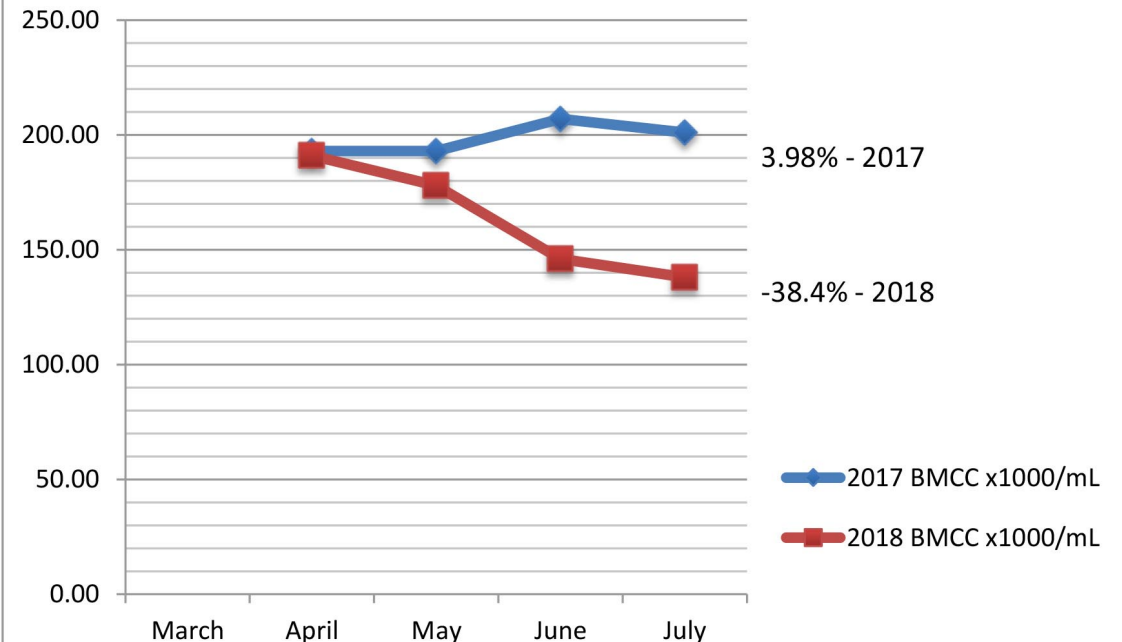

Dairy Location - Darling Downs, Qld Milkfat (%m/v)

Dairy Location - Darling Downs, Qld True Protein (%m/v)

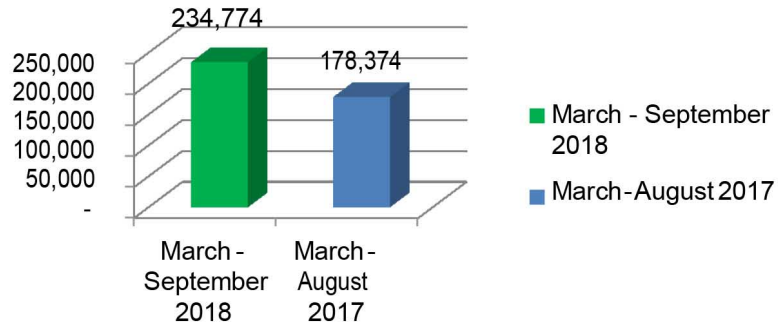

Somatic Cell Count - using BioAktiv in Darling Downs, Qld

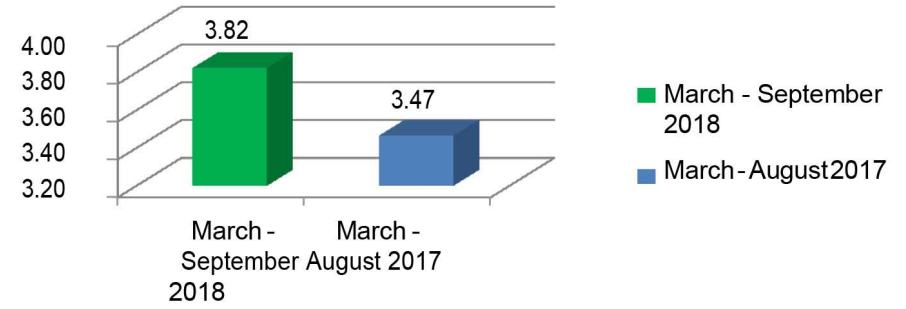

*Note: TMR dairy - Farmer informed us the reason for the drop off in Milkfat percentage was, they started feeding ryegrass day and night (in July) and they had a fat issue. A drop off in Milkfat percentage from 4.08 in June to 3.53 in July

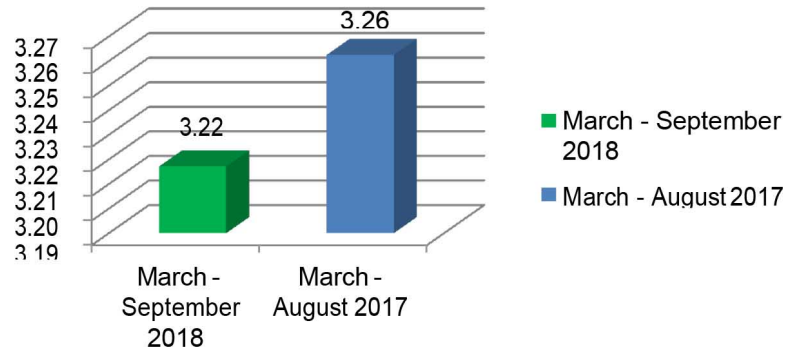

Dairy Location - Lockyer Valley, QLD - Volume (L)

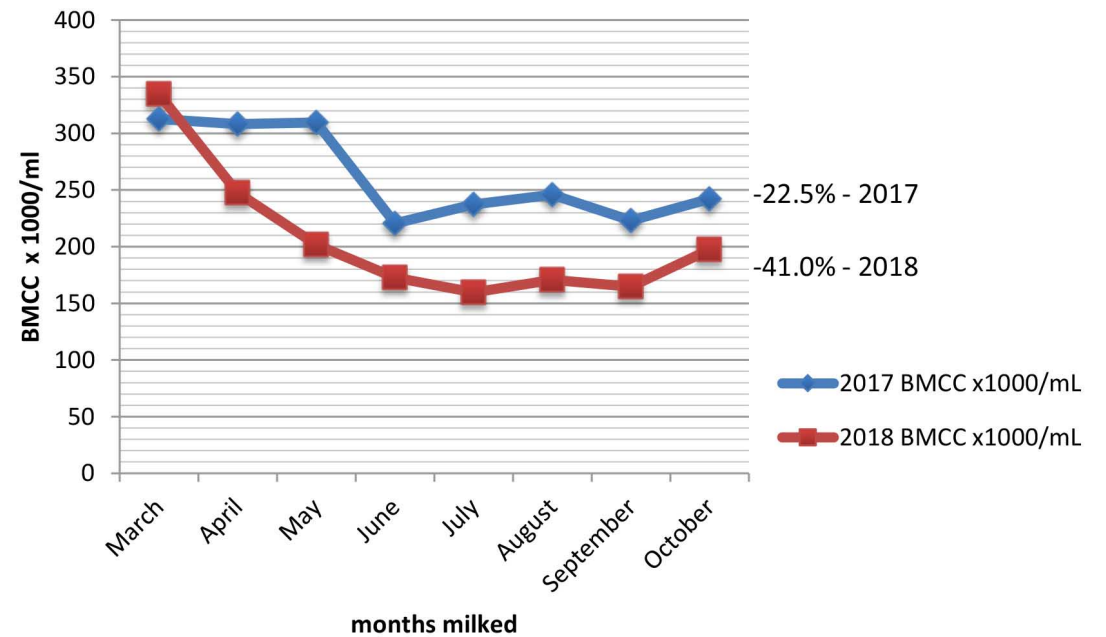

Dairy Location - Lockyer Valley, QLD - Milkfat (%m/v)

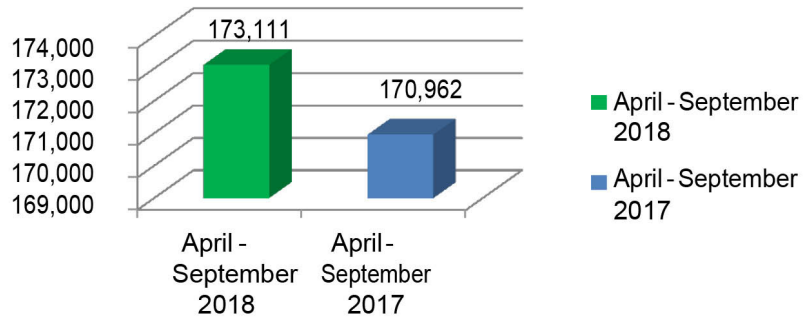

Dairy Location - Lockyer Valley, QLD - True Protein (%m/v)

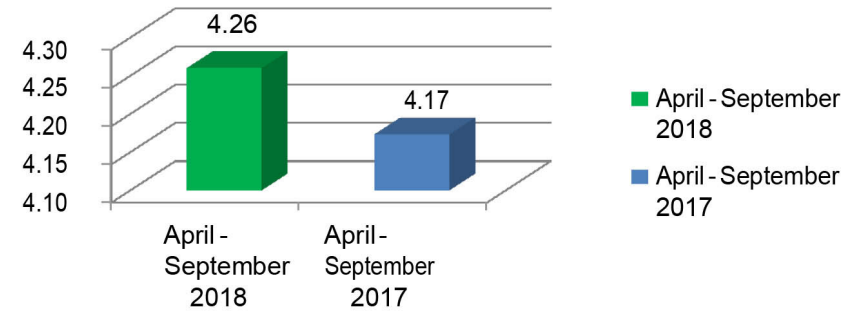

Somatic Cell Count - using BioAktiv in 2018 Lockyer Valley, Qld

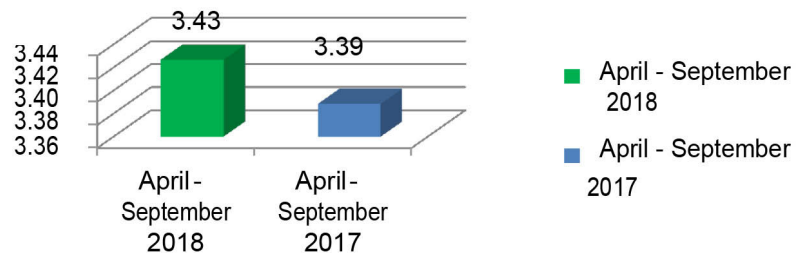

Dairy Location - Northern Rivers, NSW - Volume (L)

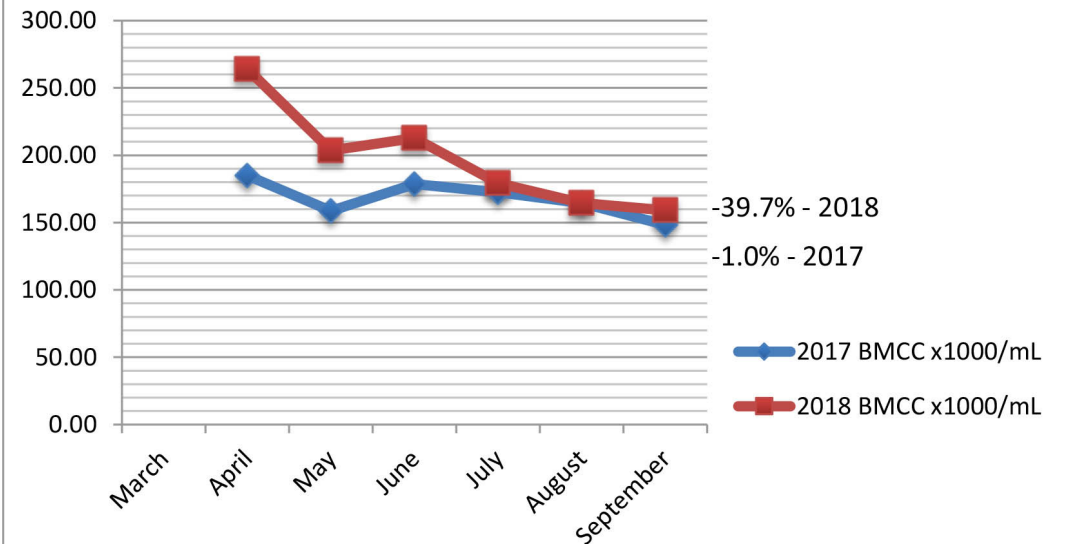

Dairy Location - Northern Rivers, NSW - Milkfat (%m/v)

Dairy Location - Northern Rivers, NSW - True Protein (%m/v)

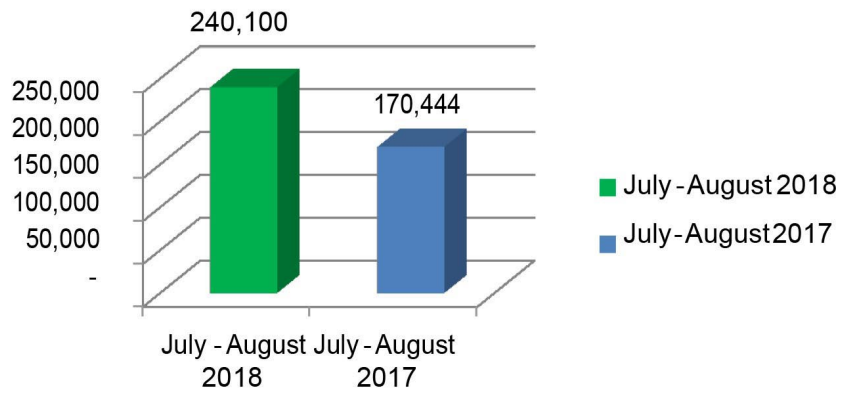

Somatic Cell Count - using BioAktiv in 2018 Northern Rivers, NSW

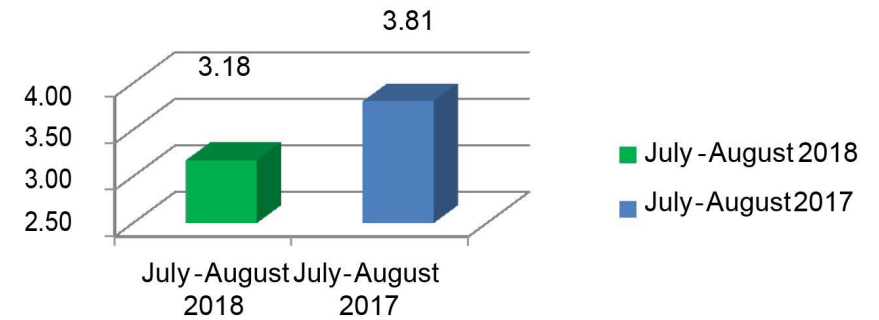

* Note :From the farmer- BMCC average up due to a couple of cows in the herd. Note for the month of July, BMCC 179.21 down 33.6 from June (PASTURE BASED DAIRY)

Dairy Location - Northern Rivers, NSW (#2) - Volume (L)

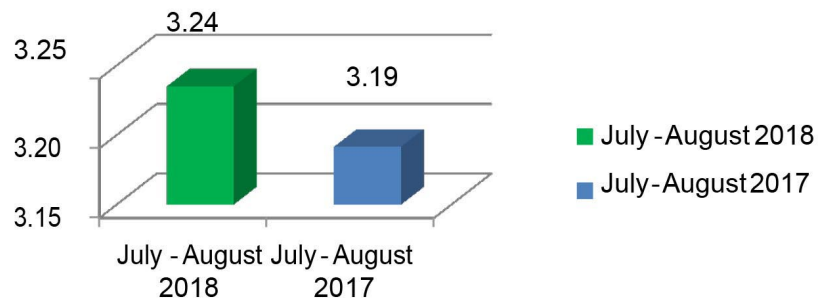

Dairy Location - Northern Rivers, NSW (#2) - Milkfat (%m/v)

** Note : The farmer commented, milkfat is down due to feeding silage, hence lack of roughage in the herd diet*

Dairy Location - Northern Rivers, NSW (#2) True Protein (%m/v)

Data has not supplied however, cell count was noted during this period of introduction to be reduced
